Education

Jaypee University of Engineering and Technology

Guna, MP | Aug 2019 - Jul 2023

B.Tech in Computer Science

CGPA: 8.1/10

Coursework: Software Engineering, Object-Oriented Programming, Data Structures & Algorithms, Networks, DBMS

Skills

Languages: C#, Java, JavaScript, SQL, C, C++

Tools: Docker, Jenkins, BitBucket, PostMan, Jira, Git, ElasticSearch, OpenSearch, Kibana, AWS-S3, DynamoDB

Frameworks & Libraries: ASP.NET Core, Web API, VueJS, React-Native, NextJs, Specflow, Dapper

Experience

Associate Product Engineer | DeltaX

Bangalore, Karnataka | Aug 2023 - Present

- **Enhanced user acquisition** by implementing app store redirection in the web tracker, directing users to the appropriate mobile app store when the app is not installed. Impacted key clients including ClearTrip, Vaaree, and Sephora.
- **Improved marketing analytics** by integrating support for Facebook parameter tracking, boosting campaign performance insights.
- **Refactored and optimized** the React Native SDK to support tracking via intent-filter-enabled URLs, increasing compatibility and functionality across platforms.
- **Boosted system efficiency** by 15% and reduced runtime by 50% through database and microservices-level optimizations, leading to significant cost savings.
- **Containerized legacy applications** to remove device dependency, ensuring portability and scalability across environments.
- **Built an end-to-end affiliate deal creation system**, enabling dynamic commission computation based on configurable business rules.
- **Redesigned the attribution model** to support event tracking via coupons; integrated with platforms like Shopify, aligning with modern e-commerce attribution practices.
- **Developed and deployed** a NuGet package for event weight calculation, alongside a custom Jenkins pipeline for continuous integration and automated deployment.

Associate Product Engineer Intern | DeltaX

Bangalore, Karnataka | Feb 2023 – Jul 2023

- Completed an extensive training program with proficiency in both frontend and backend technologies.
- Contributed to the development of a full-stack website, implementing diverse functionalities and consistently meeting project milestones.

Projects

FileSphere

NextJS, NginX, Docker | Oct 2024

- Frontend Development: Built the app using Next.js and Daisy UI for a clean and responsive interface.
- Routing: Used file system-based routing to make navigation easy and intuitive.
- Backend Management: Set up a local NginX server for managing files and directories.
- File Operations: Made it easy to upload and download files.
- Containerization: Used Docker to make the app easy to deploy and run anywhere.

Cinerate

ASP.NET Web API, Sql, Vue | Jul 2023

- Project Overview: Successfully completed this project as part of the evaluation during my internship at DeltaX, demonstrating technical expertise and problem-solving skills.
- Database Design: Designed the database schema for the website and developed stored procedures to handle complex queries, ensuring efficient data management.
- API Development: Built RESTful APIs and implemented a service and repository layer to streamline client-database interactions. Utilized Dapper to ensure smooth and efficient data transactions.

Achievements

- Recognized as one of the top performers from the batch of 2023 at DeltaX.
- Solved 500+ coding problems across platforms: LeetCode, CodeChef, and Codeforces.
- Earned 5-star rating on HackerRank in Language Proficiency and 3-star under problem solving.
- Secured a 3-star rating on CodeChef by participating in monthly/weekly contests.
